

Hackaton

Welfare technology

What is the idea?

There will be a transnational and transsectoral group of students who will work together in a hackaton for about two weeks.

Every year a school is a host and they prepare the project

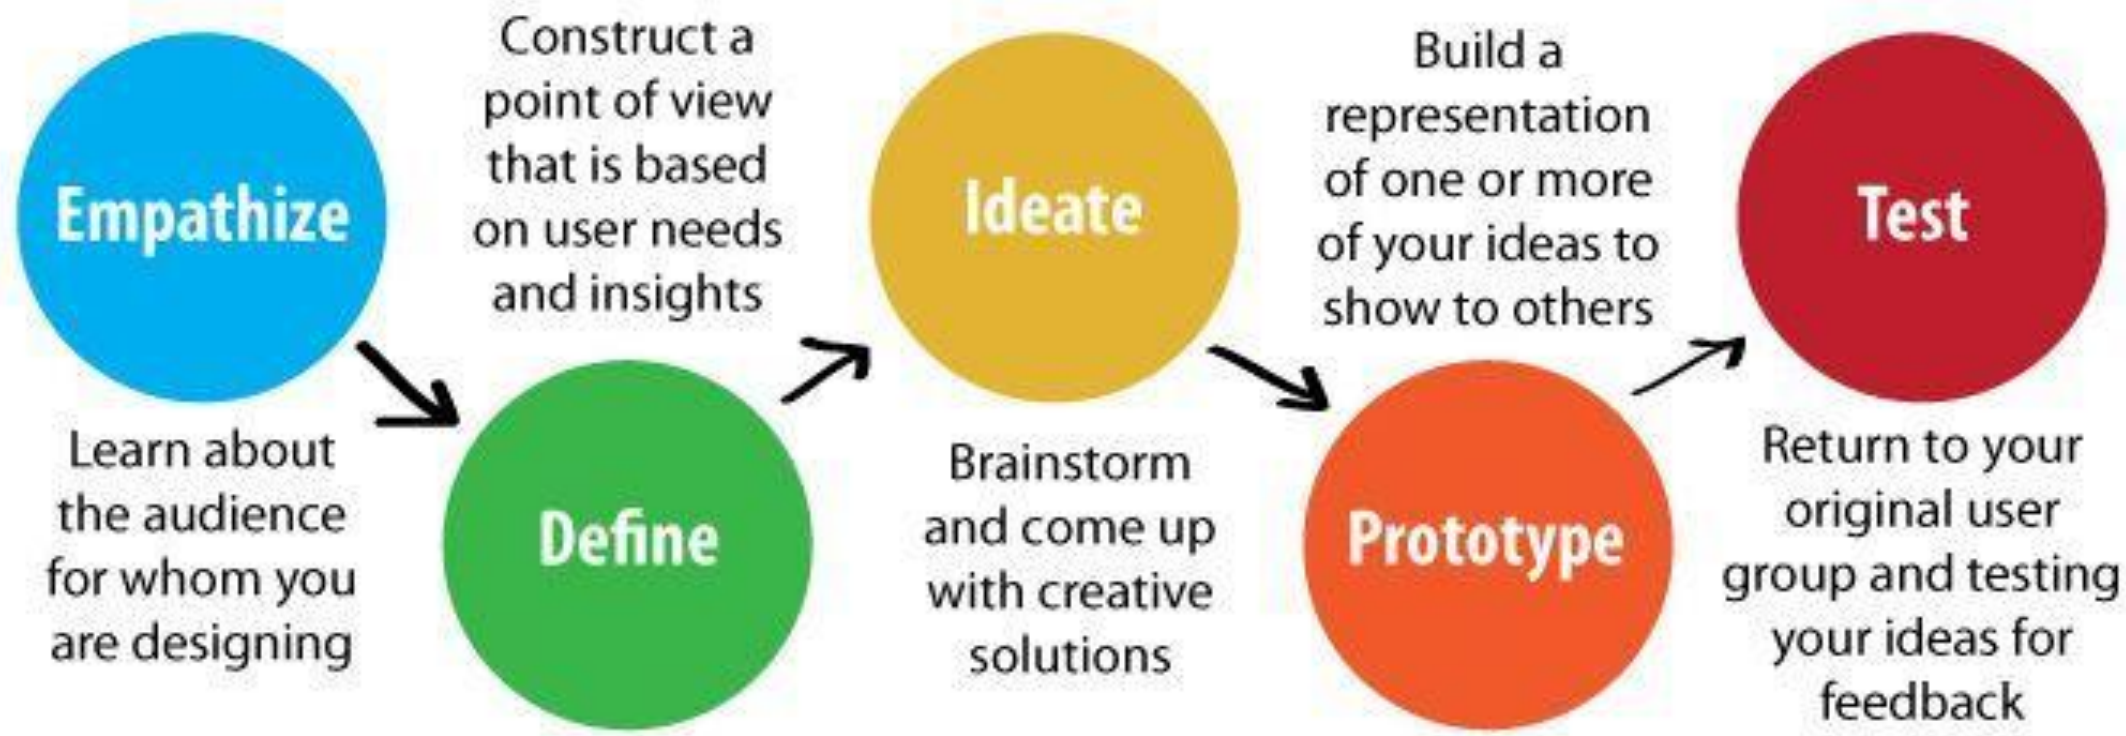

The Hackaton will be a mix for level 3 and 4 technical, IT and healthcare students

During this period students will work together in a healthcare center and find a solution for a problem in the healthcare center.

Include: day lessons at school, have a cultural activity and working on the project in the healthcare center

Achievements

- Students work together in a cross sectoral setting
- Students work together in a transnational setting
- Students learn about different cultures
- Students learn to be creative about finding solutions for a problem
- Students learn about healthcare in a different country
- Students learn to speak English in a better way
